Participation is only possible with this writable and savable PDF document. Please do not submit your own documents. Attachments are not permitted.

The jury will receive pages 3-10 of this competition form with an anonymous participant number for its deliberations. The competition form can be filled out in English, but in this case a German translation must be sent along. This may have been translated by one of the common translation tools, but should then be marked as such.

The cover sheet is only used for the subsequent assignment of the winning entries.

We wish you much joy and success in developing your business idea!

5. FINANCE

Plan the economic development of your company in the first three financial years in simple form. The fields in the table are filled in with the values of a sample company to give you a feel for how the individual items are valued in real financial plans.

Overwrite the sample figures and incorporate the values from your previous explanations. Play with the individual cost items to get a feel for your business model. Your company should generate a surplus by the third financial year at the latest.

	1ST FINANCIAL YEAR	2ND FINANCIAL YEAR	3RD FINANCIAL YEAR
A TURNOVER (ACC. POS. 2.4)			
B MATERIAL COSTS(ACC. POS. 2.4)			
C PERSONNEL COSTS(ACC. POS. 4.1 & 4.2)			
D OTHER COSTS (REFERENCE VALUE: 10% OF A)			
E BUSINESS EQUIPMENT(ACC. POS. 2.3)			
F LIQUIDITY REQUIREMENTS/ YEAR FROM TURNOVER (REFERENCE VALUE: 30% OF A)			
G TOTAL LIQUIDITY REQUIREMENT(E + F)			
H THEREOF OWN FUNDS (REFERENCE VALUE: 20% OF G)			
I THEREOF LOANS (REFERENCE VALUE: 80% OF G)			
J CORRESPONDING INTEREST RATE (IN %)			
K EXTERNAL CAPITAL COSTS(I * J)			
L RESULT(A-B-C-D-K)			

The above planning calculation deliberately neglects many elements of real financial plans, such as depreciation and amortization or taxes and duties. It reduces the complexity of planning to an absolute minimum and clarifies the essential economic relationships.
